Open Call: Introducing cpecX – A New Learning Management System at Kathmandu University Powered by Open edX

The Kathmandu University School of Education, through the Continuing and Professional Education Center (CPEC) is thrilled to formally announce the development of cpecX - an innovative, open-source Learning Management System poised to transform our approach to digital learning.

Built upon the robust and globally renowned Open edX platform, cpecX is designed to provide scalable, flexible, and interactive learning experiences for the educational landscape and beyond. This initiative directly aligns with national education goals for higher education and reflects our dedication to expanding access to professional development courses, blended learning programs, and lifelong learning opportunities.

Key Objectives of the cpecX initiative:

- To establish a customized Open edX platform tailored to the unique needs of KUSOED's digital learning ecosystem.
- To develop and deliver impactful online courses, particularly in critical educational areas.
- To foster collaborative opportunities within Kathmandu University and with global institutions.
- To provide regular support and maintenance for the LMS.

cpecX is envisioned not merely as a technical platform, but as a catalyst for digital transformation in education at KUSOED. It aims to become a central hub for MOOCs, blended learning initiatives, and collaborative programs.

Interested parties can send their proposals by **June 16th, 2025** to: cpecp@kusoed.edu.np
